

CELEBRATING **50**

The Bluegrass Chapter of APICS,
in partnership with LeanCor, LLC
presents

Operational Excellence

February 21, 2008

What is Operational Excellence? Excellence in every function of the organization.

Why is it important? Whether your role is in Operations, Quality, Project Management, or IT, anything less than excellence limits how successful you can be, whether within your own company, in collaboration with your supply chain partners, or against your competition.

How will this workshop help? The workshop will include discussion and practice with the tools and techniques that successful companies are using to build Operational Excellence. The full agenda is included in this message.

This promises to be a dynamic, interactive program designed to give you knowledge and practice with the tools you need to move your organization, and your supply chain partners to the next level of Operational Excellence!

For more information go to www.bluegrassapics.org and ask any Officer on the "Board of Directors" page. Enroll on-line. Pay via check or credit card.

Where will the workshop be held?

The Embassy Suites Hotel
1801 Newtown Pike
Lexington, KY 40511
Phone (859) 455-5000

What's included?

- The full-day program
- Program materials
- Continental breakfast
- Buffet lunch

Our presenter:

Derek Browning,
Manager of Lean Deployment Services
LeanCor LLC

Derek Browning is the Manager of Lean Deployment Services for LeanCor LLC. Headquartered in Florence, Kentucky, LeanCor delivers Third Party Logistics and Supply Chain Management services to organizations embracing Lean and Six Sigma principles.

As Manager of Lean Deployment Services, Derek is responsible for the deployment of Lean Supply Chain strategies into LeanCor's network of customers, and the facilitation, creation and continuous improvement of LeanCor's training programs, publications, simulations, and workouts.

Derek's time in the industry has provided him the opportunity to lead lean supply chain assessments, logistics network designs, and distribution center & warehousing kaizen projects. He currently works with organizations embracing continuous improvement principles, analyzes the current state of their supply chain, generates improvement targets and goals with strategic and tactical implementation plans, executes plans, and provides coaching services.
